

ADATXML::readArray1dOPrimitive

ADATXML::read

ADAT::Array1dO::resize

```
graph LR; A[ADATXML::readArray1dOPrimitive] --> C[ADAT::Array1dO::resize]; B[ADATXML::read] --> C;
```

The diagram illustrates two function calls to `ADAT::Array1dO::resize`. The first call originates from `ADATXML::readArray1dOPrimitive`, and the second call originates from `ADATXML::read`. Both calls are represented by blue arrows pointing to the `ADAT::Array1dO::resize` function box.
