

ADAT::OrderedMapObject  
::insert

ADAT::OrderedMapObject  
::operator[]

ADAT::OrderedMapObject  
::exist

```
graph LR; A[ADAT::OrderedMapObject::insert] --> C[ADAT::OrderedMapObject::exist]; B[ADAT::OrderedMapObject::operator[]] --> C;
```

The diagram illustrates a relationship between three functions. On the left, there are two white rectangular boxes. The top box contains the text 'ADAT::OrderedMapObject::insert' and the bottom box contains 'ADAT::OrderedMapObject::operator[]'. On the right, there is a gray rectangular box containing the text 'ADAT::OrderedMapObject::exist'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'insert' and 'operator[]' functions are associated with or point to the 'exist' function.
