

Hadron::generateLittleGroupMom

```
graph LR; A[Hadron::generateLittleGroupMom] --> B[Hadron::getIrrepLG]; B --> C[Hadron::removeHelicity];
```

The diagram illustrates a sequence of three methods from the Hadron class. The first method, 'generateLittleGroupMom', is highlighted with a gray background. It is followed by 'getIrrepLG', and then 'removeHelicity'. Each method is contained within a rectangular box, and the boxes are connected by dark blue arrows pointing from left to right.

Hadron::getIrrepLG

Hadron::removeHelicity
