

ADATXML::writePrimitive

ADATXML::operator<<

ADATXML::XMLWriter
::write

```
graph LR; A[ADATXML::writePrimitive] --> C[ADATXML::XMLWriter::write]; B[ADATXML::operator<<] --> C;
```

The diagram illustrates a mapping from two methods to a single target. On the left, two white rectangular boxes with black borders contain the text 'ADATXML::writePrimitive' and 'ADATXML::operator<<'. On the right, a gray rectangular box with a black border contains the text 'ADATXML::XMLWriter' on the top line and '::write' on the bottom line. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both methods delegate or call the 'write' method of the 'ADATXML::XMLWriter' class.
