FILEDB::SerializeException

```
graph BT; FILEDB::SerializeException --> exception
```

The diagram illustrates an inheritance relationship. At the bottom, a gray rectangular box with a black border contains the text 'FILEDB::SerializeException'. From the top of this box, three dark blue curved arrows point upwards to a white rectangular box with a gray border at the top, which contains the text 'exception'. This visualizes 'FILEDB::SerializeException' inheriting from 'exception'.
