/include/xpath_reader_config
_internal.h

```
graph BT; A["/Users/archanar/Kinematic_factor/adat_devel/other_libs/xpath_reader/include/xpath_reader_config.h"] --> C["/Users/archanar/Kinematic_factor/adat_devel_install/include/xpath_reader_config_internal.h"]; B["/Users/archanar/Kinematic_factor/adat_devel_install/include/xpath_reader_config.h"] --> C;
```

This diagram illustrates a file dependency structure. At the top is a header file, `/Users/archanar/Kinematic_factor/adat_devel_install/include/xpath_reader_config_internal.h`, which is shaded gray. Below it are two source files. The file on the left, `/Users/archanar/Kinematic_factor/adat_devel/other_libs/xpath_reader/include/xpath_reader_config.h`, has a blue arrow pointing to the top header file. The file on the right, `/Users/archanar/Kinematic_factor/adat_devel_install/include/xpath_reader_config.h`, also has a blue arrow pointing to the same top header file.
