/xml_writer.h

```
graph TD; A["/Users/archanar/Kinematic_factor/adat_devel/other_libs/xpath_reader/include/xml_writer.h"] <--> B["/Users/archanar/Kinematic_factor/adat_devel/other_libs/xpath_reader/include/xml_simpleschemawriter.h"]; B <--> C["/Users/archanar/Kinematic_factor/adat_devel/other_libs/xpath_reader/include/xml_schemawriter.h"];
```

The diagram illustrates a set of dependencies between three header files. At the top is a box for `xml_writer.h`, which is shaded gray. Below it to the right is a box for `xml_simpleschemawriter.h`. At the bottom is a box for `xml_schemawriter.h`. Blue arrows indicate that `xml_writer.h` depends on `xml_simpleschemawriter.h`, `xml_simpleschemawriter.h` depends on `xml_schemawriter.h`, and `xml_schemawriter.h` depends on `xml_writer.h`, forming a cyclic dependency.
